DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The instant application is directed to an emergency vehicle traffic signal preemption system. Each independent claim identifies the uniquely distinct combination of features including "a real-time status monitor for monitoring status at a selected intersection and verifying preemption of the intersection". This patentable distinction is included in all independent claims 1, and 11. The closest prior art, Gross et al. (US 6,326,903) and McConnell et al. (US 5,710,555). Gross et al. disclose a system that allows operators of emergency vehicles to obtain graphic data regarding other emergency vehicles that may pose threats of collision, and McConnell et al. teach the preemptive traffic control signal to control the Pedestrians Walk/Don't Walk and traffic lights to cause pedestrians to clear the intersection. The references, either singularly or in combination, fail to anticipate or render the above limitations obvious.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion.
